Department of Pediatrics

Who We Are

THE CHA DEPARTMENT OF PEDIATRICS has an expert team of doctors, nurses, and support staff that provides coordinated care to children and teens from across the greater Boston region.

All our doctors are on the faculty of Harvard Medical School and oversee the education of students as well as pediatric residents from Massachusetts General Hospital. This allows us to stay current on the most recent medical treatments and to provide your child with some of the finest pediatric care available in New England.

In 2007 and 2008, we were named to the Harvard Pilgrim Honor Roll for Pediatrics.

INSURANCE: We accept most insurance plans including Tufts, Blue Cross, Harvard Pilgrim Health Care, MassHealth, Network Health, and many Commonwealth Care plans.

Our Services

- **Pediatric Primary Care.** We have more than 25 pediatricians and nurse practitioners who work at numerous Boston-area locations (turn over for a map).
All of our sites are linked by a state-of-the-art electronic medical record, allowing us to understand your child's needs wherever they touch our system. Our doctors are also on duty for sick visits 365 days a year.
- **Specialty Care.** We understand that sick children need special care. That's why we provide specialists from Massachusetts General Hospital at the CHA Cambridge hospital campus. We are also national leaders in asthma care and mental health services for children.
- **24-hour Care.** We provide 24-hour emergency care for children at each of our three hospital campuses. These services are coordinated by a board-certified, fellowship-trained Pediatric Emergency specialist. Our Cambridge Hospital campus has special pediatric emergency exam rooms. If your child is seriously ill or injured, and needs overnight care, we have an arrangement with Massachusetts General Hospital that enables your child to be directly transferred and admitted.
- **Newborn Services.** We work closely with the Department of OB/GYN to care for babies before they are born and as newborns in our Level I nursery. This work is supervised by an experienced, board-certified neonatologist.
