## **Coronary CT Angiography Patient Post Exam Instructions**

- You may resume your normal activities and diet.
- It is suggested that you increase fluids throughout the day.
- You may resume your normal medications as ordered by your Doctor.
- If you are on one of the metformin derivative medications for your diabetes, you will be given additional instructions.
- During your exam, you may have been given medication to slow down your heart rate. If you feel dizzy, lightheaded, or feel any discomfort, please call your Doctor or the Radiology Department at 617-665-1599.
- If a complication arises and you do not know what to do, report to the Emergency Department with this instruction sheet.
- The results of your exam will be sent to your Doctor within one week.
