CHILDREN’S MINDS ARE PRECIOUS

When children are experiencing a mental health crisis, they often spend days waiting in Emergency Departments across the state for a psychiatric bed to become available. The Department of Mental Health (DMH) manages this list. CHA admits twice as many children from DMH than the nearest hospital system, getting children connected to necessary mental health support when they need it most.

ImproveING HEALTH
WITH BOOKS

Each child who came to CHA for a well-child visit in 2019 received a free book thanks to the many 2019 Bike4Books Spin-a-Thon fundraisers.
We are never too old or too late to make a difference.

Mary Porun is just two days shy of her 99th birthday. She is a patient at the PACE Program and a member of CHA Aging Wisely Event. She is also famous for her knitting hats. On a chilly March evening, Mary went to the Malden Warming Center with her administration was instrumental in establishing the Warming Center. It’s open with CHA colleagues to donate dozens of her colorful winter hats. When asked how she'd like to be thanked, she smiled and said, “Oh, please...say a prayer for me.”

The Malden Warming Center is one example of how we are working to fill the gaps and surrounding communities in the CHA service area.

The Madlen Warming Center is one example of how we are working to fill the gaps in this work will continue. You make the difference and we are so grateful to you!

KEEP ON SMILING

Most people don’t know how much their oral health impacts their overall health. Brian Swann, D.D.S., spent his CHA career helping people see this connection. His vision and passion supported our work providing fluoride treatments in elementary care, free for every Somerville High School immigrant students, oral health screenings in Everett for grades K-8, and treatment for students in the Cambridge Healthy Smiles Program. After Dr. Swann’s retirement this June, his legacy of bringing dental care to the people will continue through these important programs.

ONE DAY TO BETTER HEALTH

There are still many people who don’t have insurance coverage for basic services, making it impossible to get the care they need. Last fall, CHA physicians and staff offered free women’s health screenings to over 80 uninsured or underinsured women aged 21-65 at our annual See, Test & Treat program.
