

# Family Medicine Pregnancy Care

## Locations

The Department of Family Medicine has doctors, resident doctors, nurses and staff who provide pregnancy care at three different Family Medicine sites at CHA. In addition to providing prenatal care and supporting your delivery at Cambridge Hospital, you may also choose to bring your baby to the same clinic after they are born so the whole family can receive care together.

For more information and a complete listing of our sites and services, visit [challiance.org/familymedicine](http://challiance.org/familymedicine).
